

King Air Type Rating BE20

A type rating on a King Air BE20 is a notable asset for newly trained pilots seeking their first job in the aviation industry. This course is designed to train pilots to work with other crew members and build the team skills necessary for safe operation of a complex turboprop aircraft. Developing Crew Resource Management (CRM) skills along the way, this training demands extreme attention and focus in both ground school and in each phase of flight, including normal, abnormal and emergency conditions.

Ground School & Flight Training Summary

Aircraft	BE20, ALX Flight Training Device
Ground School	45 HOURS –BE20 Ground School CRM &Garmin Training \$1500.00 Books and Study Material \$300.00
8 hours dual instruction on BE20 @ \$2100.00 / hour	\$16,800.00
22 hours on ALSIM ALX Flight Training Device	\$5280.00
2 Hours Garmin 650, 600 Training in BE20 @ \$2100.00 / hour	\$4200.00

Approximate Course Total \$28080.00

For more information on Transport Canada's minimum requirements to obtain a BE20 rating, [see the Canadian Aviation Regulations](#).

Additional Costs

Individual Ground Instruction (as required)	\$135.00 / hour
Transport Canada Licensing Fees	\$30.00

We believe in high quality training and transparency. We quote a realistic estimate for the cost of training, rather than just the minimum hours stated by Transport Canada.

Actual cost will vary depending on student ability and study skills.
